### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance: The prior art references fail to teach or reasonably suggest forming a gap of 200 microns or less, without contact, between the photocatalyst treatment layer and the property variable layer during exposure. In the prior art references that comprise exposing a property variable layer through a photocatalyst layer, the property variable layer and photocatalyst layer are in contact with each other, and there is not a small gap between the two layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
